COLEMAN JURY MAKES IM- PORTANT RECOMMENDATIONS

The coroner's inquest into the cause of death of George Lothian and John Labdek opened at the Town Hall, Coleman, on Monday, November the 19th, Coroner A. M. Morrison presiding.

The following jury was impanelled: William Wright, foreman; W. Graham, G. R. Powell, Walter Bobbitt, George Pattinson and George Nell. After viewing the remains, adjournment was made to 6.30 p.m. on November 26 at the K. of P. Hall, when the various departments were represented as follows: Department of Mines, by Moses Johnson, district mines inspector; International Coal & Coke Company Limited, by R. F. Barnes, solicitor; Mine Workers' of Canada, by Frank Wheatley, president; Workmen's Compensation Board, by Ed. Royle, mine rescue car superintendent. Const. W. L. Warke acting as stenographer.

Witnesses examined were: John A. McDonald, Walter Nelson, Dr. Robert F. Stewart, Nelson Fleming, David C. Roberts and John G. Cox.

Mr. McDonald submitted a plan, showing the part of the mine where Labdek and Lothian met their death, and where Walter Nelson was found.

Nelson Fleming a fire boss, gave evidence as to the finding of the bodies of Labdek and Lothian. Prior to reaching them scattered tools and clothing gave evidence that something serious had happened. Advancing near the spot, a dim light was noticed, but this went out before the victims were reached.

John G. Cox, pit boss, submitted plans, showing the course the air had taken.

During the hearing the hall was crowded beyond standing room. At the conclusion Coroner Morrison summed up the evidence and addressed the jury as follows:

"I have listened patiently to all the evidence given here on this very case, and having listened to all this evidence, we are not very much wiser. There is nothing to show there was any carelessness on the part of any mine official, except Nelson. Why Nelson went there we have not found out. Your duty is to bring in a verdict as to when, where and by what means these men came to their death. They came to their death in Room 187 by methane gas, between 5 and 8 on the morning of November 17th. You will retire and consider the evidence and bring in a verdict."

The jury retired at 9.30 p.m., and returned at 10.15 with the following verdict:

"That George Lothian and John Labdek came to their deaths on Saturday, November the 17th, 1928, some time after 5 a.m., in Room 187 of the International Coal & Coke Company's mine at Coleman, by methane gas poisoning, in an effort to rescue fire boss Walter Nelson.

"We find that Walter Nelson had unwisely entered this room without his safety lamp, knowing there was gas there, which was contrary to the instructions of his pit boss.

"We strongly recommend that in future any fire boss found in any part of the mine without his safety lamp, that his certificate be cancelled immediately.

"We commend the heroism of George Lothian and John Labdek, also the work of the Mine Rescue and First Aid men."

To accommodate the family of H. N. Hummel of Vancouver, who was recently appointed secretary of the International Coal & Coke Company, Limited, a fine eight-room modern residence is to be erected toward the north end of Park terrace, which commands a splendid view of the surrounding mountains of Coleman. Mr. Hummel will bring his family to Coleman the early part of the year

ELKS' BIRTHDAY PARTY IS MERRY AFFAIR

The fourth birthday party of the Blairmore Lodge of Elks, held at the Greenhill Grill on Monday night last, was largely attended and most enjoyable.

The committee in charge were Messrs. Ralph Wootton, W. Dempster and A. E. Ferguson, the exalted ruler.

The programme started with whist at 8 o'clock, twenty-two tables being at play. The prize winners were as follows: ladies—first, Miss Kathleen Tompkins; second, Mrs. E. McDonald; consolation, Mrs. M. B. Ross; gents—first, Capt. W. A. Beebe; second, J. M. Sweeney; consolation, Fred H. McKay. During the whist playing, the Hillcrest Orchestra rendered a number of pleasing selections.

A dainty luncheon was served, followed by dancing to the sweet strains of music rendered by the Melody Kings' orchestra. At the "hour of eleven," the Elks' service was recited by Mr. J. R. McLeod, and during an interval the monster birthday cake was cut by Mrs. Ferguson and distributed.

FRANK WHEATLEY RE-ELECTED

In the elections for officers of the Mine Workers' Union of Canada, held on Tuesday of last week, Mr. Frank Wheatley, of Calgary, was re-elected president by acclamation.

Other officers elected were as follows: vice-president, Frank Leary, of Blairmore; secretary-treasurer, M. Hyalop, of Coleman; sub-district board members—sub-district 1, Thos. Smith, Blairmore; sub-district 2, John W. Lowe, Lethbridge; sub-district 3, E. W. Mallabone, Canmore; sub-district 4, A. Pruett, Nordegg; sub-district 5, A. Leivers, Wayne; sub-district 6, J. A. Childerstone, Leduc. All the above will hold office for two years.

BRING IN VERDICT OF ACCIDENTAL DEATH

The inquest into the death of James William Holmes concluded at Bellevue last night, when the jury, composed of C. Emmerson (foreman), James Allsopp, L. Maurice, S. Humble, E. Rhodes and W. Kerr, returned the following verdict:

"That James William Holmes came to his death on November the 27th in Bellevue hospital, due to accident on November the 9th on the eighth level, near 115 raise of Bellevue mine, by being crushed between car and timber while following his occupation as brattice-man.

"We attach no blame to any person."

Don't fail to see "The Wind," Friday or Saturday, at Orpheum theatre. It's a picture of human souls in conflict. It is a drama in the raw, unfolded with relentless realism and power.

An organization meeting of the C. N. P. Hockey League will be held in Blairmore on Friday night, November the 29th. Representatives from Bellevue, Hillcrest, Coleman and Blairmore will be present. A schedule for the season will be drawn up.

An industrial development committee has been appointed by the Drumheller board of trade for the purpose of investigating the possibilities of Drumheller as a logical centre for industries. A similar move on the part of Blairmore would not be amiss.

About \$2000 worth of foxes were killed off at the Dalton fox ranch near Lundbreck over the week end. His company started in about two years ago with a couple of pairs of foxes and today their kennels contain around sixty, all in excellent condition.

MOOSE, ATTENTION!

Members of Blairmore Lodge of Moose are requested to attend the regular meeting on Monday night next, when important business will be transacted.

A number of local parties journeyed to Fernie over the week end to visit David Oliver, who is reported progressing at the Fernie hospital following an operation recently for an advanced case of appendicitis. It will be some weeks yet before Dave will be able to leave that institution.

AT SEA—A heading in the Calgary Albertan, referring to Labor's gain in Winnipeg, states: "Seven Aldermen Will Occupy Seas As Labor Men"

LOCAL UNION MEMORIALIZES PROVINCIAL GOVERNMENT

The following message was sent to Premier Brownlee of Alberta, from the Blairmore Local Unit No. 1 of the Mine Workers' Union of Canada, on November the 26th:

"Blairmore Unit No. 1, Mine Workers' Union of Canada, vigorously protest against the issuing of provisional certificates to strike breakers in the Wayne coalfield, when hundreds of miners with certificates of competency refuse to accept the inadequate rate offered. The Act did not anticipate such action when passed by the Legislature."

Val says: "The Wibley-Woobley stores will not open a branch in Blairmore."

WORLD HAPPENINGS BRIEFLY TOLD

Plans are being made for construction next spring of an airport at Chicoutimi, Que., for land and sea planes.

The financial collapse of Russia is imminent, according to a ministerial statement in the British House of Commons.

A tri-city air service between Seattle, Victoria and Vancouver and a service between Seattle and Alaska will be started next April by the Union Air Lines.

By the end of this year it is expected that the British Columbia government will have prepared for Lord Lovat a settler scheme, Premier Tolin says.

The Graf Zeppelin will make no second trip to America this year. The Zeppelin works in announcing this, said that the necessary supply of gas was not available.

Major Yochio Inoite, counselor at the Japanese embassy at Buenos Aires, who was drowned in the sinking of the Vestris, has been posthumously promoted to lieutenant-colonel.

The Canadian Memorial Chapel, a sanctuary in memory and in honor of the seventy thousand Canadians killed in the war, and erected in Vancouver through the efforts of Lieut.-Colonel the Rev. G. O. Parris, B.D., C.B.E., has been opened there.

It will relieve a cold. Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passage of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Consolidated Wheat Pools

Have Marketed Huge Amount of Grain During First Five Year Record

During the first five-year period the consolidated pools of the three western provinces have marketed approximately 750,000,000 bushels of grain, coarse grains included, with a total turnover in money exceeding \$1,100,000,000. During that time the three pools have accumulated through elevator deductions and commercial reserves, which belong to the grower, over \$20,000,000.

Dairy Industry Flourishing

Outlook Never Appeared Brighter Than At the Present Time.

"The outlook of the dairy industry in Canada never appeared brighter," says Dr. J. A. Rudick, commissioner of the dairy and cold storage branch of the Department of Agriculture. "The value of our dairy production this year will be around \$285,000,000. We have approximately 3,800,000 milk cows in Canada. They are in every province although Ontario and Quebec have the most. While the cheese production is not a record one this year, it is very high. About 100,000 boxes more will be exported in 1928 than in 1927. Canada produced the most milk in its history this year."

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When that first symptom appears—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are gentle but thorough agents that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Distinguished Visitors To Canada

Sir Austen Chamberlain, British secretary of foreign affairs, who recently made a tour of Canada with members of his family. Sir Austen and Lady Chamberlain were decorated together by his majesty the king for their services in the completion of the Locarno peace pact. Recently Sir Austen's health has been the cause of considerable anxiety and this journey apparently had its effect as the foreign secretary reported that he felt "quite well." These two pictures were taken in Toronto. (1) Miss Diana Chamberlain; (2) Sir Austen.

Windolite

Improved Glass Substitute Is Now Available In Canada

"WINDOLITE"—the English unbreakable improved glass substitute, which is now so popular in the British Isles, is being marketed in Canada by John A. Chantler & Co., Limited, 49 Wellington St. West, Toronto, Ontario.

Severest tests carried out in England, showed that "Windolite" is remarkable, not only for its unbreakable strength and ultraviolet ray penetration, but it was found that "Windolite" will stand up under glass substitutes.

The fact that "Windolite" is translucent and allows 100 per cent. daylight with the life-giving ultra-violet ray to enter, opens a wide scope of practical uses. The importance of which will at once suggest themselves. Windolite consists of transparent solution, reinforced with fine special galvanized wire mesh, which results in a substance that is completely waterproof, airtight, and dust-proof. It is flexible and unbreakable, and may be readily cut with the ordinary pair of scissors to the required size. It therefore forms a practical substitute for glass, and where transmission of ultra-violet radiation is required to protect health and growth, it is ideal. These beneficial rays are vital to young chicks, laying hens, dairy herds, and live stock, and also economical for nurseries, nurseries, nurseries, hospitals, schools, and for hot beds and plant coverings. It is light but strong.

Quoting from some British authorities, they have the following to say of "Windolite": "A well-known poultry breeder, member of S.P.B.A., N.U.P.S., and National Farmers' Union, whose farm is a Certified Breeding Station, under the Ministry of Agriculture and Fisheries, says of Windolite: 'I have proved to my satisfaction the benefits obtained from the use of Windolite in my brooder houses. It replaced the ordinary glass on one side only with your substitute, and although it has been in use only a matter of a week or ten days, the results are very marked. The chicks on this side are doing very much better than those of the other. I have kept both sides indoors for the purpose of noting the results.'"

"British Medical Journal," April 1925: "Windolite has been used by poultry keepers and market gardeners as a substitute for glass, but it is now suggested that as it allows ultra-violet rays to pass much more freely than ordinary glass, it may be of use in medicine. It has been examined for us and it is found that as claimed, it lets the ultra-violet rays through freely."

Bishop's Castle, St. Hippolyte:—"I shall be pleased if you can send me as quickly as possible—I have had a frame in use for nearly three years, and it has proved very satisfactory." (Signed) C.W.D.

This effective glass substitute will no doubt become very popular with stock breeders, dairy men and poultry breeders. It should also be a boon to mining camps and prospectors who cannot pack glass successfully over rough trails without breakage. It will stand up under rough treatment, and has the added advantage of being flexible.

Cuts and Bruises Disappear

When suffering from cuts, scratches, bruises, sprains, sore throat or chest, use Minard's Liniment. It is a sure cure for all these ailments. It is a sure cure for all these ailments. It is a sure cure for all these ailments.

Volcanic Dust
Volcanic dust found in Saskatchewan and British Columbia is used for purposes similar to ground pumice, particularly in the manufacture of cleansers and scouring powders, and in some instances as a substitute for fuller's earth in the refining of hard oils and fats.

"This is Mrs. Warrior's third husband, isn't it?"
"Yes. She's two down and one to go."

Minard's Liniment for Asthma.

SUNDAY SCHOOL LESSON

DECEMBER 2

PAUL BEFORE HIS JUDGES

Golden Text: "I was not disobedient unto the heavenly vision."—Acts 26, 19.
Lesson: Acts 24:1-26:32.
Devotional Reading: Psalm 25:1-6.

Explanations and Comments

Paul Before Felix and Drusilla, 24: 24-26.—Some days later, Felix sent for Paul that he and Drusilla might hear him in regard to his faith in Jesus Christ. Drusilla was a Jewess, the daughter of Herod Agrippa I. (whose death is narrated in Acts 12: 20-23).
Although Felix trembled, his only answer to Paul was, "Go thy way for this time; and when I have a convenient season I will call thee unto me." Felix does not think that he is deciding the question that Paul has raised. He thinks that he has postponed the decision, but he hasn't. For indecisive procrastination is one of the most conclusive methods of decision that mankind knows. Life's processes do not call a halt simply because we have not made up our minds. If you have a garden-plot, you may suppose that you have three choices; either to leave them, or to have weeds, or to be a garden, uncertain, undecided. But in fact you have only two choices. As if you choose flowers, you must have them; but if you decide to be indecisive, nature will decide for you—you will have weeds. The processes of God's eternal universe do not stop to wait for us to make up our minds. To make flowers grow means positive decision. And to become a Christian requires positive decision. But you must make up your mind to it. And if any Felix endeavors to be indecisive, he is not really indecisive. His life processes still go on without Christ because he has not positively decided for Christ.—H. E. Fosdick.

Branch Line Construction

More Than 350 Miles Of New Lines and 71 New Stations Built By C.P.M. in Past Season
The building of more than 350 miles of new branch lines, with 71 new stations and shipping points sums up in brief the construction programme of the Canadian Pacific Railway in Western Canada during the past year, according to D. C. Coleman, Vice-President, Western Lines. By this means hundreds of farmers had been brought much closer to transportation facilities, and thousands of acres of rich agricultural land had been made much more attractive from the settlers' viewpoint. The construction programme has gone forward rapidly, and as a consequence a considerable amount of this year's crop is being marketed over the new tracks. Mr. Coleman pointed out a feature of the branch line construction was found in the rapidly with which settlement followed the laying of the steel. Country elevators to the number of approximately 300 were already built in the course of construction, while in many cases towns were beginning to spring up around the newly erected station buildings.

New Source Of Electricity

River Mud Is Attracting Attention Of Scientists In Europe
Scientists of Europe are taking an interest in reports that mud is to be the source of electrical supply at a power station being erected at Kassel, Germany. The mud will be extracted from the River Elbe. It is said to contain a combustible material that by a new method will be extracted, dried and then used for fuel for the works. The best value is declared to be equal to that of coal. Investigators declare that the new process is of international importance because there are many rivers in coal districts throughout the world, the mud of which could be turned in the same manner.

Gold Ranks Third In Importance,

as a source of metals of the platinum group, after Russia and Columbia.

Don't eat fast, if you are thin.

Don't eat. Fast—if you are plump.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, greenhouses, conservatories, hospitals, nurseries, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in square yard length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs. while square yard of glass of ordinary thickness weighs about 130 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

CHAPTER VII—Continued.

He was known under several sobriquets: "Trapper" John, "Coffee" John, and "Mahogany" John. "Coffee" John, for the excellence of his brew of that beverage, and of which he drank enormous quantities. His call to meals: "Come and throw your feet under the mahogany," supplied the reason for the cognomen of "Mahogany" John.

With the assistance of their host they unadvised the three horses and turned them in the pasture, where they rolled luxuriously on their backs for a moment, and then started feeding hungrily on the rich sward.

A wind shook the tree-tops and turned the surface of the lake dark with ripples. High in air, streaming dark clouds scudded swiftly by.

"Get here just in time," said the old trapper, as he looked up at the sky. "It's a sign to rain. Come inside."

John had served as cook in a cowboy camp in Texas. He never overlooked an opportunity to make ostentatious display of his skill in the culinary art.

"Just set my bread this mornin'," he explained, "so 'I'll hev ter make a bannock."

Taking a tin pan from the shelf, he threw it the full length of the room to the table. He tossed the cooking utensil about like a practiced juggler. Soon the bannock swelled to the rim of the frying-pan, the edges showing brown and crisp. He turned the bannock over the stove, and with a dexterous twist of his wrist threw the bannock to the ceiling and caught it nearly in the centre of the pan as it came down. He dipped a half dozen trout in the yolk of eggs, rolled them in flour, then tossed them with apparent carelessness, but with deadly aim, one at a time, to the sizzling pan. From a shelf he took two glass jars and turned their contents into an earthenware dish on the stove. Immediately the room was filled with an aroma that caused the newcomers to sniff hungrily.

"Mr. Hillier," began Andy, "what's that?"

"Mr. Hillier! Hell! My name's John," exploded the trapper.

"I was goin' to ask you what kind of meat that is that smells so good," grinned Andy.

"Muskrat."

"What?"

"Muskrat," repeated the host, turning to the astonished Australian.

"Did ye ever eat any?"

"No," returned Andy weakly, "I don't care much for meat anyway."

"They're darn good eatin'," affirmed the trapper. "Reason folks won't try 'em is because they think that they are a rat. Their right name is musquash, and they live on vegetable food only. Did any of you fellows ever see 'Diamond Back Terrapin' on a bill-of-fare in restaurants?"

"I have, many times," answered Donald.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vancouver, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have been suffering from a long time which four are living and my youngest child is a healthy baby boy now eight months old who weighs 23 pounds. I have taken your medicine and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same benefit."—Mrs. M. L. MILLER, Vancouver, B.C.

W. N. U. 1761

throat his leathery cheeks folded and unfolded like the pleats of an accordion.

"Wow!" he yelled, "she's sure got a kick!"

The humorous toast and the trapper's facial contortions sent Andy into paroxysms of laughter.

"Strike me blind!" he gasped, as he held his sides. "I never—!" His eyes rested again on the trapper's convulsed features. Speech failed him and he sank speechless in a chair.

When finally they climbed the ladder to their bunk the rain had ceased and a brilliant moon flooded the valley with a white light.

Donald awakened as the first grey streaks of dawn brightened the dusty windows of the loft. The sky suddenly filled with the sweet song of birds. Wild-fowl quacked and splashed in the waters of the lake. The aroma of coffee and frying bacon and the pungent odour of wood smoke was wafted strongly from below.

Suddenly the trapper's shaggy head protruded through the opening at the top of the ladder. "Get out o' the hay an' let the sun shine on ye!" he boomed.

"Now, let's get busy," said Gills, when breakfast was over. "The first thing to do is to find a good spot to pitch our tent."

"You'll find a deserted cabin at 'other end o' the lake that'll be a whole lot more comfortable nor a tent," informed the trapper.

The cabin of cedar logs proved to be in good repair and the location excellent.

"A couple of days' work," observed Gills, "an' I can fix her up so she'll be as snug as a bug in a rug."

John had spent the forenoon baking. Cakes, pies, doughnuts and bakes were placed at regular intervals on the shelves in platters and tins tipped at an angle to make the display more effective. It was an exhibit of pastry that any housewife might envy.

The uninitiated paragon of his guests was like music to the trapper's ears.

For dessert they had a savoury mince-pie, steaming hot from the oven. Andy waxed most eloquent in his praise of this culinary delight.

"Have another piece, o' timer," insisted John, as he transferred a big slice to his plate.

"Like it, do ye?" asked John.

"U-m-m," mumbled Andy as he devoured the last crumb and settled back with a sigh of content.

John's wrinkled old face spread into a wide grin. From his lips came a cackling laugh.

"What's the joke?" queried Andy.

"I thought 'I'd get that muskrat in ye somehow," chorled the trapper.

"Well, I's not so durned bad, after all," philosophized Andy.

On the third day after their arrival they moved to the cabin at the head of the lake. There followed days of arduous toil, days spent in "blazing" lines through almost impassable swales, up steep hillsides and through canyons. Days of strenuous exercise in the stimulating air, when the bright sunshine tanned their faces to a deep brown, brought the glow of perfect health to their eyes, and gave to their muscles the resiliency and strength of steel springs.

(To Be Continued.)

Six Thousand Years Old

Fish Found in Sweden Belongs to Later Ice Age

An interesting discovery has just been made in the North of Sweden where some workmen when digging at a distance of 24 feet from the surface came across a curious object embedded in the river mud. It was found to be the remains of a fish belonging to the later Ice Age, and according to geologists is about 6,000 years old.

The old trapper, standing in the centre of the room, presented a figure wild and strange. His coat of buckskin was open at the throat to expose a hairy chest. His mane-like mass of wiry hair stood straight out and shook with every movement of his body. A veritable wild man of the woods he looked as he grasped the cup and held it up to his admiring gaze.

The storm had reached the height of its fury. The wind roared and moaned like a famished wild thing devouring its kill. Occasionally a venture, some gust would find its way down the chimney to send thin puffs of smoke to linger in the air and fill the cabin with the sweet perfume of the burning alder.

"Give us a toast, John," begged Andy.

The trapper raised his cup on high. "I'm the trapper of the mountain top. A ring-tail-moor an' a dead-sea shot."

"I'm wild, I'm woolly an' full o' feez, I've never bin' carried below the knees. I live on the fruit o' the prickly pear."

"An' I play in the brush with the grizzly bear."

"Here's hopin' ye'll never see the back o' yer neck," he added. Then placing the cup to his lips he drained the contents with one great gulp. John's jaws were well-nigh toothless, and as the fiery liquor scorched his

World Stand Repeating. An old maid went to confession and told the priest that she had been ardently kissed.

"When did that happen?" said the priest gently.

"Twenty years ago," the old maid told him.

"Have you ever confessed this before?"

"Many times, father," sighed the penitent, "but I just love to talk about it!"

Teeth and Health

Prepared by The Canadian Dental Hygiene Council and Published by The Dental Society of Canada

TOOTH BUILDING FOODS

You decide to build, as you approach an architect who draws up plans and specifications; then the contractor walks in and supplies the materials called for, and your house goes up according to plan and without a hitch.

Now your tooth. Here's a piece of masonry: Nature the architect, you are the contractor.

The element of chief importance in the development of teeth and bones is the calcium content, such as is supplied in the form of milk, eggs, in cereals, in fresh fruits, vegetables, such as carrots, asparagus, cabbage, Brussels sprouts and many others.

First the foundation must be well and truly laid so the diet of the expectant mother should contain liberal amounts of these foods.

Now, as to the child, you may be aware, the teeth have been forming since before birth and their development continues throughout the early periods of childhood, until they erupt almost fully formed. So the diet of the mother to the child and sixteen years should receive special care.

Also (it is also important to note), in the period from the third to the sixth year, there is present in the infant jaw the greatest number of teeth that will ever contain.

There are in eruption at this time twenty temporary teeth and in addition, the developing germs of twenty-eight permanent teeth, making a total of forty-eight fully or partially erupted teeth at this age and onward, the demand for lime phosphorus and other inorganic salts, apart from the needs for these materials for the developing of bones, is unusually high.

The lime-calcium is necessary in the clotting of blood and in the digestion of fats, so that if there is an undue supply of this element in the diet, the most available source to meet this starvation is in the lime of the teeth and bones, and in consequence, when called upon to meet these requirements for vital purposes the teeth are structurally weakened and are left more prone to disease. Then your structure falls—and whose fault?

When Work Was Story Of The Days Before The Advent Of The Eight Hour System

That old story about the city man who yearned to surprise the farmer with whom he had engaged to work through a harvest might be applied with force to those pioneer days in Canada, when a good farmhand was judged by the amount of sweat he could shed for \$1.50 a day. This city chap set his alarm clock for three and sallied forth shortly after that hour in black darkness, sanguine that he would delight his employer. On turning a corner of the barn he met the farmer, who had a brimming pail of milk in either hand and held the ball of a lantern in his teeth. Placing the pails upon the ground and lowering the lantern, the farmer, with a withering glance, remarked, "Where have you been this hull day?"

But that was before the eight-hour day became general and some farmers were satisfied with their lot, while not a few, because of its independence, declared farming the ideal occupation for the man who loved nature in all her aspects.—Free Press.

Letters Raced Around World

Winner Made Entire Trip In Seventy-Eight Days

People are growing so accustomed now to flyers going east and west, men and women crossing continents and oceans, that nothing which touches on flying can surprise one very greatly. But it is interesting to know that lately two letters have been racing round the world by established sea, air and rail mail routes.

The letter which won, the first letter to go all the way round the world in the open mails, finished at Seattle, United States, in 78 days, 1 hour, and 30 minutes.

So much of a charity fund goes to pay overhead expenses; why not give the office jobs to those who need charity

Teacher—What is the highest form of animal life?

Little Peter—That's the giraffe!

Sacred White Elephant

Elephant Specimen Reported To Have Been Captured In Siam

A sacred white elephant—which in Siam is of great religion and political significance has been found in Changavd Khukhand, according to advices from the royal family from that province.

The holder of a special elephant catching permit in Changavd Khukhand informed officials here that he had captured the elephant in one of the regular "round ups" and that it had been inspected by authorities there and declared a true white elephant. The ministry of interior immediately dispatched an expert to the district to conduct a formal investigation and the country awaits his report with great excitement.

The local elephant catcher was sorting over a herd which had been driven into a trap when he discovered the unusual beast. It was described as a five foot tall male with 15 inch tusks. It is a particularly fine specimen and if it proves to be a real white elephant—it will be installed with elaborate ceremonies at the capital.

At this season of the year when an intestinal "flu" is prevalent and in this age when so many are worried by high blood pressure and "nerves," too much care cannot be taken to keep the system entirely free from poisons and impurities. Mariatt's has for many years been found most valuable in toning up the liver, in keeping the intestines functioning normally and in preventing bile stagnation. Try this highly recommended treatment now.

Five Dollars Recommended and sold by all leading druggists.

Characteristic Of Japan

Everything About Country and People Is Small But Not Weak

Perhaps the first impression on landing in Japan is the littleness of everything. The little stately houses, the little stately shops, the small men, the toy-like women, the tiny children, as numerous and like unto each other as the sands on the shore—these are everywhere. But although very small of stature the Japanese men are often very powerfully built, and many of them suggest great strength.

Littleness—with which is associated the most delicate detail and elaborate finish—is the mark also of the modern Japanese art. In the curiosity shops whatever was massive or largely simple was Chinese. Even the Royal Palaces at Kyoto are small, the rooms, exquisite as they are, with perfect joinery and ancient paintings, being seldom more than a few feet square, with very low ceilings.

Provincial Highways Are Through Streets

Motorists Approaching From Side Roads Should Remember This

Motorists who know that Provincial Highways are through streets depend upon others obeying the law, and when they note a car approaching from a side street they naturally expect that car to come to a stop, and so they act accordingly. When the car doesn't stop accidents are sometimes narrowly averted, and in other instances they actually occur.

It is well to remember that all provincial highways are through streets. The person who enters such a highway does so at his own risk, and if an accident is caused, that person is entirely to blame. The only safe way to approach a Provincial Highway is to come to a full stop, to be sure that there is a reasonable opportunity to enter without causing danger to traffic. Moreover, this is the law, and it must be obeyed.

Northern Alberta Fish

During the quarter year ending September 30th, American firms purchased 1,686,222 pounds of northern Alberta fish, valued at \$193,918, as compared with 1,568,223 pounds during the same period of 1927.

Feeble, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Barbara—My auntie has been to France, Italy and America. And now she's gone to Heaven.

Muriel—My word! She does get about, doesn't she?

Doctor—Madame, your husband is smoking himself to death.

Wife—How long will it take, Doctor?

"THE NEW BOY"

IS WELL RECEIVED

A crowded opera house greeted the Blairmore Players last night, when the three-act play, entitled "The New Boy," was very ably staged.

The cast included the following: Ralph Wootton, as Archibald Rennie, the new boy; R. W. H. Pinkney, as Dr. Candy, L.L.D., principal of Birchgrove school at Dulwich; J. V. McDougall, as Felix Roach, a speculator; J. R. McLeod, as Theodore de Brizac, a French master, and Mr. Stubber, a farmer; Leonard McDougall, as Bullock Major, a pupil; Miss J. Peake, as Mrs. Rennie; Miss C. Chrystal as Nancy Roach, Felix Roach's daughter, and Mrs. J. A. Packer, as Susan, a servant.

Each artist performed his or her part well, displaying considerable ability as amateurs. Their performances were continually applauded and at times elicited uproarious laughter from the audience.

During the intervals, a number of lively selections were rendered by the new twenty-piece Coleman orchestra. The furniture for the stage setting was very kindly loaned by Mr. W. I. Evans, of the Blairmore Exchange.

As we go to press we learn that the play will be repeated at Hillcrest on Wednesday night next, December 5th, in Cole's theatre, under the auspices of the United church, and will in all likelihood be taken to Pincher Creek in the near future.

As a result of last night's effort, a neat sum was realized, to be handed over to the Anglican church funds.

GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA
APPLICATION FOR BEER LICENSE

PUBLIC NOTICE is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass, or open bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and regulations made thereunder, with respect to the following premises:

The Bellevue Inn, situate on Lots 22, 23, 24 and 25, Block 1, according to a plan of record in the Land Titles Office for the South Alberta Land Registration District as "Bellevue 6669-A-O" the beer saloon to be on the ground floor at the northwest corner, with entrance from the hotel entrance and from the side lane.

Dated at Bellevue, Alberta, this 22nd day of November, 1927.

ANTONIO CANTALINI (Licence) Applicant.

Joint-Ease
For Stiff, Swollen Joints

RHEUMATIC OR OTHERWISE

Says: "When Joint-Ease Gets In—Joint Aches Gets Out."

It was a high-class physician who saw prescription after prescription fail to help hundreds of his customers to get rid of rheumatic swellings and stiff, inflamed joints.

And it was this same man who asserted that a remedy could and would be compounded that would make craky, swollen, tormented joints work with just as much smoothness as they ever did.

Now this prescription, rightly named Joint-Ease, after being tested successfully of many obstinate cases, is offered through progressive pharmacists to the millions of people who suffer from ailing joints that need limbering up.

Swollen, twiny, inflamed, stiff, pain-tormented joints are usually caused by rheumatism, but whatever the cause Joint-Ease soaks right in, through skin and flesh and sets right to and corrects the trouble at its source.

Remember Joint-Ease is for all sorts of the joints, whether in ankle, knee, hip, elbow, shoulder, spine or finger and when you rub it on, you may expect speedy and gratifying results.

It is now on sale at drug stores everywhere for 50 cents a tube.

COWLEY HAPPENINGS

The Women's Auxiliary: is holding a bazaar on December the 30th.

Blood Poison is recovering from a severe case of scarlet fever, we are glad to say.

Cowley was well represented at the dance put on by the Lundbeck girls on Friday night last.

The Cowley Women's Institute held their regular monthly meeting at the home of Mrs. A. S. Donald on Thursday evening, November 22nd, with an average attendance present. The principal business of the meeting was laying plans whereby the work of planting trees around the cemetery may be carried out. The building of a board fence to protect the young trees is now under construction.

A whist drive was held on Wednesday night, November 21st, under the auspices of the Women's Institute. Mrs. George Porter giving her home for the occasion. A crowd of sixty or more gathered to spend the evening at cards. Twelve tables were at play and a jovial spirit kept the players merry throughout the game, after which prizes were awarded as follows: ladies' first and second to George Bird and Thomas Sheppard, who were playing as ladies, while the gent's first and second went to Harry Goss and Mr. Mundie, respectively.

The bachelors were awarded to Mrs. Harvey Bouthiller and Doolie Easterbrook. After the drive, tables were arranged, when everybody sat down to enjoy a tasty repast, prepared by the W. I. members. After doing ample justice here, the house was made ready and the fantastic to be tripped for an hour to the merry old tunes such as "It's a rocky road to Dublin," "The Devil's Dream," etc. A fine time is reported. The Institute funds were swelled to the tune of twenty-five dollars, which will be used in planting trees around the cemetery.

MASQUERADE DANCE
IS UNUSUAL SUCCESS

A most successful masquerade dance was held in the Moose Hall on Monday night of this week under the auspices of the Blairmore Chapter of the Women of Mooseheart Legion. Splendid music was furnished by the Altermatt orchestra. The costumes were very unique and attractive, and the judges, Mrs. Gray, Mrs. Ennis and Mr. E. McEwen, had a task on their hands to decide the winners. The winners were as follows: best dressed lady, Miss H. Jarvis, a pirate; best representative lady, Mrs. John Paul, a queen; best comic lady, Mrs. Dorzimo, a coon; best dressed gent, Mr. Fred Paul, a Rajah; best representative gent, Mr. M. Pavan, a devil; best comic gent, Mr. George Patterson, a happy hooligan.

The recent announcement of the Family Herald and Weekly Star to give a year free with a two-year subscription appears to us a move in the right direction. Not that the Family Herald needs to reduce its price; it is recognized that at one dollar per year it is the greatest value in Canada today. The "year free" offer, therefore, means this—the subscription is still one dollar for one year, but for two dollars you receive a subscription for three years instead of two years. Hundreds will literally leap at this big offer and well they may. When one considers that for a two-dollar bill you can have a paper of the calibre of the Family Herald and Weekly Star coming to your home for three full years—it goes without saying that it is a somewhat tempting offer.

A skeleton found in a remote corner of the Bassano golf course has been identified as that of a Scottish man who could not find his ball.

Bow legs are a sign of courage, declares Norman Shields, citing Alexander the Great, Cromwell, Napoleon and bulldogs. He advises that bulldogs and low-legged girls be petted with caution.—Medicine Hat News.

**BLAIRMORE UNITED CHURCH**

Rev. J. W. Smith, B.D., Pastor

Serve the church that the church may serve you.

Services Sunday, December 2nd, the Pastor in charge:

SENIOR SCHOOL at 11 a.m.

JUNIOR SCHOOL at 2 p.m.

EVENING WORSHIP at 7:30 p.m.

Subject: "Fruitful Companionship."

CHURCH NIGHT PRAYER SERVICE, Wednesday, 8 p.m. Subject: The Parables of Jesus. "The Children at Play." L. 7:31-35, and "The Wine and the Figlish Builders," L. 6:46-49.

LADIES' AID—The regular monthly meeting of the Ladies' Aid will be held in the Mission Hall on Wednesday next at 3 p.m. All members are urged to attend.

INSTITUTE OF MANUAL TRAINING AND HOME ART—The English Class for New Canadians is well under way and meets Mondays and Thursdays at 7 p.m.

DECEMBER FIFTEENTH is the date set for the Tea and Sale of Work done by the boys, girls and young people. This is no ordinary sale of work. Many surprises will meet the visitors. We hope to give the Institute a financial send-off, and we confidently appeal to the general public, because the classes of the Institute are open to all residents of Blairmore.

THE INSTITUTE PUBLIC LIBRARY—We are now ready to receive any worthwhile books you would like to put into the library. We acknowledge a fine contribution of forty-five volumes from a Blairmore citizen this week. As soon as we have 1000 books classified and on the shelves, the library will be open to the public.

It is intended that the library shall be a Public Library in the fullest sense. For the present it will be operated as the "Institute Public Library," but it is hoped that in the near future it will be possible to place it in the care of and under the control of the Town Council, when it would become "Blairmore's Public Library."

ST. LUKE'S, BLAIRMORE (ANGLIAN)

Service next Sunday—Evening at 7 p.m.

Junior Guild meet every Monday after school; Ladies' Guild the second and fourth Thursdays.

Next meeting of the Guilds (special) will be held on Thursday, December the 6th, at the home of Mrs. Weaver, at 2:30 p.m., to make arrangements for the sale and concert to be held in the Elks' Hall on December 12th.

A. D. CURRIE, Incumbent.

Marked Way Down

THE PASS FIFTEEN YEARS AGO

(The Blairmore Enterprise, 1918)

Oct. 24.—A movement is on foot to electrify the entire C.P.E. system, according to a declaration made today by Sir Thomas Shaughnessy, president.

The Blairmore Brewing & Malt Company hope to have their plant product on the market within six weeks.

Thomas Frayer, one of the pioneer settlers in Blairmore, died at his new home in Calgary last night, following a long illness. For a number of years

he served this community as chairman of the village council and also the school board. He leaves a wife and daughter to mourn their loss.

Tenders will be received by Messrs. Nature & Creator up to noon Monday, October 27, for the erection of a solid brick block on Victoria Street, Blairmore. The building is to be 1600 by 115 feet, concrete basement, four storeys of brick with steel frame overhead. For plans and specifications, apply to Nature & Creator or V. Lemieux, Blairmore's leading barber.

Messrs. Gresham and Johnson spent Thanksgiving Day among the chickens in the neighborhood of Burns.

Emmeline Fankhurst, the noted militant suffragette, was denied entrance to the United States on the grounds of having committed a crime in her own country involving moral turpitude.

A slight fire occurred in Robbins' auto garage on Sunday.

On October the 17th, Germany's latest and greatest Zeppelin exploded at a height of 900 feet, killing thirty persons.

Mr. and Mrs. J. F. Lank contemplate spending the winter in Colchester, Nova Scotia, and will return to Cowley in the spring.

A number of local sports are looking forward to a chicken-hunting trip to northern Alberta. The trip is to be made in an auto just purchased by Tom Cyr.

Noble McDonald has returned to Bellevue from a visit to his old home in Nova Scotia.

It has just become known that Harry C. Moore has been acting solicitor for Blairmore since May last.

The following have entered The Blairmore Enterprise-F. M. Thompson Co. contest: Lena Fraser, Maggie

Patterson, Nora Lees, Mary Stanage, Grace Turner, Beatrice Baird and Mrs. Hifton.

A man named Schmidt, in police court at Sydney Mines a few days ago, stated on oath that he had drank a barrel of beer and two gallons of whiskey in one night.

Oct. 31.—The remains of the late Thomas Frayer were laid to rest at Calgary on Saturday.

Mrs. Aitken, of Toronto, is spending a few days here with her daughter, Mrs. W. T. Young. Mrs. Aitken and a lady friend arrived unexpectedly from the Pacific coast, where they had been visiting.

Fred Fudgett, of Bellevue, is celebrating his 122nd birthday on Tuesday next. Only single men of his own age are invited.

Nov. 7.—Considerable of a furor ensued at Monday night's meeting of the council, when an account was submitted by Harry C. Moore for the sum of \$246.10 for legal services. Members of the council declared they knew nothing of Mr. Moore's engagement as solicitor, but the bill passed for payment, with the mayor breaking a tie vote.

A company, backed by American capital, proposes to develop Pat Burns' coal claims in the Highwood district.

Joseph Vasseur, the seven-year-old son of Mr. and Mrs. Leo Vasseur, was hit by a freight train while in the act of crossing the C.P.R. tracks on Tuesday, losing his left leg.

In a hot game played in front of P. Burns' store today, Charlie Roy won six marbles from Bob Patterson. A return bout will take place in a few days.

Pete Pistor's new house on Fifth Avenue is nearing completion.

Alberta's liquor profits for the fiscal year amounted to \$2,788,000.

A one-million-dollar concentrating plant is planned for Grand Forks.

Modern Aladdin's Lamps

The average man and woman realizes that the world is making progress at an ever accelerated pace; that in the space of a few brief years greater improvements and more wonderful inventions are made to add to the comfort and pleasure of life than were recorded in many centuries of the past. There was a time when people received news of any great innovation with extreme skepticism, and ridiculed the idea of such things being possible. Today, the world is prepared to accept almost anything as possible.

However, it is the occurrence of some anniversary which actually forces upon us a realization of just how great and how rapid is the progress being made by the human race. Such an anniversary came last October when recognition was paid to Thomas A. Edison, in commemoration of the golden jubilee of what is generally accepted as being the greatest of his many great inventions, the incandescent electric lamp.

The tale of Aladdin and his wonderful lamp has delighted readers, youthful and adult, for many generations, but the accomplishments of man in the world of electricity following Edison's invention of his marvelous lamp, and the series of amazing inventions since then, and all more or less directly connected with Edison's discovery, in many respects surpass the most vivid imaginings of the Arabian Nights tale.

In this age of electricity, with our streets, homes and places of business lighted by the invisible current, our machinery operated by it, our homes heated by it, with every conceivable household device dependent upon it, with it as the agent to flash our news and messages around the world, and because of which we are enabled to talk under the oceans and through the air, it becomes well-nigh impossible to imagine a world lighted by the old kerosene lamp and tallow candles. Yet it is only fifty years since the world so labored in comparative darkness.

Had Edison, the wizard of Menlo Park, not succeeded in his effort to produce the incandescent lamp, would the world today enjoy all the pleasure and profit of the radio, which depends upon the use of the vacuum tube? Would the health giving rays of the quartz lamp be conferring benefits upon stricken humanity. No. To Thomas A. Edison the world is forever debtor for his great contribution to humanity's welfare and the world's wealth.

Fifty years! Not equal to the average span of a man's life. Yet Edison within that space of time has given us not only the incandescent lamp and all that has followed that initial invention, but to him belongs the credit of capturing the human voice upon a cylinder of wax, thus giving us the gramophone. It is thanks to Edison that we are able to produce pictures in which people move as they do in actual life, an invention that is profoundly affecting the life and thought of the world. And now we have the talking movies, the result of a combination of two of Edison's original inventions.

Within an even shorter space of time the automobile has not only been brought to its present state of efficiency and power, but it has been adopted all over the world, completely revolutionizing our manner of living and our mode of travel, and enormously broadening our knowledge of the world in which we live. Within the short space of a decade we have witnessed the airplane take its place as an accepted instrument in our modern life, and even on these Western prairies it is now a daily commonplace to witness these new messengers winging their speedy way from city to city carrying passengers, mail and express.

Science and invention is thus conferring upon this generation new wonders and new facilities of power, greater opportunities for pleasure and profit, or, ill-used, greater possibilities for catastrophe. With all the powers now being placed so rapidly under his control, man must continue to mount higher in intelligence and in all those moral attributes which alone will make him fully capable of rightly using the great possessions entrusted to him, and the number and variety of which increase almost hourly. For it must be remembered that in the final analysis the use or abuse, the deriving of good or the suffering of evil, arising out of these wonderful scientific achievements, depends upon man himself and the attitude he takes towards life and all its realities and possibilities.

Woolen Mill For B.C.

British interests have recently established a plant for the manufacture of worsteds at Victoria, British Columbia. This plant has 6,400 spindles and promises to prove an important industry for the capital of British Columbia.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,115,940,782 pounds.

In England 2,500 automobiles are being delivered to new owners every week.

Several coal mines in Ireland are being abandoned.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

In Memory Of Colonel McCrae

Oak Tree From Georgia Planted On McGill College Campus

During Armistice Day a two-year-old oak tree was planted on the McGill campus, at Montreal, in memory of Col. John McCrae, author of "In Flanders Fields." The tree was sent by the State Teachers College, of the University of Georgia, on whose campus a similar planting took place at the same hour. It is noteworthy that the best known and most beautiful poem, inspired by the Great War, should have been written by a Canadian, and the action of the Georgia College is also a friendly gesture which will be much appreciated on this side of the border.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that this blood is a most common cause of the trouble. Trying to cure rheumatism while the blood remains thin and weak is an impossible task, because there is nothing to build up. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases; here is one—Mr. J. W. Ross, R.R. 2, Albany, P.E.I., says: "For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I have never had a recurrence of it since. It is the best advice I have ever received. You can get these pills from any medicine dealer or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

Our Great Agricultural Wealth

Canada the Best Country in the World For Farming

"I can say without any hesitation, that Canada is the best country in the world for farming at the present time. It has greater possibilities, and more resources, and it is the greater stability and prosperity than can be found in any other country," said Dr. E. S. Archibald, director in charge of the Dominion Experimental Farm at Ottawa, addressing the Young Men's Canadian Club at Montreal. Dr. Archibald said the crops in Canada are worth \$1,167,000,000, which alone was equal to the fisheries and mines and forests all put together; dairy produce reached \$300,000,000 which was equal to the total of the fisheries and mines and forests; \$422,000,000, or a third of the country's total exports and that there were over 225,000,000 acres capable of producing, but not occupied. He estimated the Dominion's agricultural wealth at \$7,820,000,000, and that at least \$3,800,000,000 of capital was invested in agriculture.

Aerial Photography

Work of Government Fliers Practically Completed For The Season

Aerial photography for map making purposes by Government fliers has been practically completed for the year according to Wing Commander J. L. Gordon, R.C.A.F. Eight detachments of two planes each have been operating throughout the Dominion for several months. Three machines operating at St. Donat, Quebec, have already returned to Ottawa, while the remainder are expected within the next few weeks. Aerial surveys have been made throughout the Maritime in Northern Ontario and as far north as Fort Smith in the Northwest Territories. Preliminary maps of the various localities covered will be completed with data gathered this year.

Gypsum Products

Probably the most important developments in the gypsum industry in Canada have taken place in the products manufactured from gypsum. A number of years ago a small exportation of the gypsum mined in Canada was calculated in this country. In 1927 approximately 192,000 tons were calcined and made into wall plaster, gypsum wall board, gypsum blocks, and insulating material.

More than 1,000,000 bags of coffee will be rated in Venezuela this year.

Effect Of Sunlight

On Dairy Products

Particularly Detrimental On Milk, Cream and Butter, Says Authority

Dr. E. G. Good, Chief of the Division of Dairy Research, of the Federal Department of Agriculture, states that it is a well established scientific fact that direct sunlight has a detrimental effect on the factor of practically all dairy products, and especially on milk, cream and butter.

This statement was given by Dr. Good, when questioned regarding the schedule of housewives using window-sills as refrigerators, during the autumn season when they have stopped taking ice. From the standpoint of keeping the products cool, the window-sill answers the purpose, but if the window is located where direct sunlight can reach it, dairy products should never be kept there.

Milk, cream and butter when exposed to direct sunlight quickly develop abnormal flavors which are generally of a metallic or tallowy nature. This tallowy flavor is caused by the action of sunlight on butter-fat and has been known to develop to a very noticeable degree after an hour or so. In the case of butter, the fat turns to a very light or white color, and the same change takes place in the fat in milk or cream whether it is homogenized or not.

Dr. Hood states that if consumers find that milk or cream has become tallowy in flavor after keeping it for twenty-four hours, they should not blame the dairy but rather the sun. This flavor can be prevented if milk and cream is protected from direct sunlight by wrapping the bottles in a piece of yellow brown paper or by placing them in a wooden box made for the purpose, when it is necessary to keep them outside. But a cool shaded corner in the cold storage of the cellar is always a safe place to keep dairy products at this time of the year, when outside temperatures are generally lower than those obtained in the average household refrigerator.

Recipes For This Week

(By Betty Barclay)

WILD WEST RELISH

3 dozen sweet cucumber pickles sliced.
1 pound puffed raisins.
1 teaspoon whole allspice.
1 ounce stick cinnamon.
2 cups brown sugar.
1/2 ounce celery seed.
Vinegar to cover.

Place all ingredients, except celery seed, in a porcelain lined kettle, cover with vinegar and cook one-half hour over a moderate flame. When cold remove cinnamon, add celery seed, put in sterilized jars and seal as for canned fruit. This will make 2 quarts or more of relish, depending upon size of pickles used.

RED BEANS AND RICE

(A Famous Creole Combination)
1 pound of red beans.
1 teaspoon salt.
1 teaspoon butter.
1 small onion, minced.
1/2 red pepper.
Boiled rice.

Soak the beans over night, or for at least six hours. Then simmer for four hours or more in 3 full quarts of water. The beans will then be quite soft. Add the salt, butter, onion, red pepper, and continue the simmering process for two hours longer. Serve with boiled rice, and the combination is not only good but particularly well balanced. A pound of salt meat, scalded, is often substituted for the above seasoning, excluding the onion. The minced onion entirely disappears in the simmering and makes a delicious seasoning.

Need Standard Grain Crop

Hon. W. R. Motherwell, Minister of Agriculture, addressing the Canadian Club of Fort William, stressed the need of western farmers raising the standard of grain which they produce, and reducing the varieties of wheat from 80 to 40 now grown to three or four kinds, which should be regarded as standard and be the only kinds admitted to No. 1 grade.

South Africa Buying Certified Seed Potatoes

Varieties Sent From Canada Last Year Gave Good Results

Trade with South Africa in certified seed potatoes from Canada is being promoted—another tribute to the excellence of our spuds.

Last spring small quantities of Irish Cobbler, Green Mountain and Dooley varieties were shipped to South Africa from Eastern Canada. They arrived in Capetown in excellent condition and gave good results there.

The South African growers preferred Dooley as more suitable to their special requirements. This season they are testing, at their own request, other varieties—small sized seed, of two to three ounces, from certified crops.

The British Columbia Inspector is obtaining for this purpose quantities of two to three ounce seed of the following varieties:—Up-to-date, Sir Walter Raleigh, Burbank and Epicure. As there was no crop of certified Epicure in British Columbia this season Wisconsin Pride and Eliza Triumph were substituted for that variety. Results in South Africa from this British Columbia certified seed will be closely watched and may lead to the development of a worthwhile trade.

Long Standing Asthma. Many have suffered so long from asthma, and have tried so many so-called remedies they think that there is no real help for them. They should read the letters collected by the manufacturers of Dr. J. D. Kellogg's Asthma Remedy from hundreds of cases once as desperate as their own. Even in long-neglected cases this famous preparation brings prompt help.

Model Town For Alberta

New One To Be Laid Out Near Lethbridge

The first new model town in Alberta that Horace Seymour, the provincial town planning expert, will have to lay out, will be Wallace, near Lethbridge. His advice in a plan for the town has already been requisitioned.

Wallace is a brand new town that is to be built in connection with a coal mining development in the Lethbridge northern irrigation district. Premier Brownlee is advised that the Mortimer Davis coal interests of Montreal have begun a large development there, with plans so far advanced that detailed plans are about to be taken for laying out and building a town. Mr. Seymour will take up the case as soon as possible.

Canadian Gold Production

If gold production in the United States continues to decline in the fairly steady way it has done since 1915, Canada with its yearly increasing production will in a very few years be the second largest gold producing country in the world.

"How is it that gas kills so many people every year?"
"Because they step on it."

Teacher: "What is an asset?"
Little Muriel: "A little donkey."

All-Red Air Route

Important Developments In Inter-Empire Communications Expected Soon

An all-red air route around the world is seen as a strong possibility in the near future by J. A. Wilson, controller of civil aviation, who recently returned from a sojourn of two months in the British Isles and Europe. "Extensive developments in inter-empire communication may be expected within the next few years," Mr. Wilson said. "While efforts so far have been to some extent concentrated on flights to India and Africa, the eyes of British flyers are turning towards Canada." The R-100 and R-101 will shortly be ready for their trial trips, and in the early spring would be ready for trans-Atlantic trips to Montreal. Mr. Wilson viewed both of the enormous dirigibles and discussed the contemplated flights with air officials in England.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear and the child will have no more suffering from that cause.

Hemp Growing In Manitoba

Hemp growing is gradually assuming promising proportions in Western Canada. Double the acreage of 1927 has been devoted to hemp growing at Fortin in Prairie, and the yield is very good. The Manitoba Cordage Company Limited reports an increasing demand for its products.

Minard's Liniment For Chapped Hands.

Trees Used In Making Paper

Spruce, balsam, hemlock, and poplar together made up over 97 per cent of the total wood used by the pulp and paper industry in Canada in 1924.

FOR COLDS

BAYER

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is a very efficient, too, in cases of neuralgia, neuritis, even rheumatism. Aspirin is a safe remedy, there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to ensure the public against imitations, the Bayer Tablets will be stamped with their "Bayer Cross" trademark.

TO BROADEN BASE AND MAKE FOR BRITISH UNITY

Toronto.—Premier Mackenzie King declared in the address here that his administration entered the diplomatic field not only to assume responsibility for Canada's external affairs, but also because it believed that consultation and co-operation with British ambassadors abroad would serve to broaden the base and secure more firmly the foundation upon which British Empire government rested, and make for British unity and its permanency, as well as world peace.

The prime minister was speaking at a banquet tendered him by the Toronto Board of Trade at which he summarized the reasons which led his administration to open legations abroad. "It was a lengthy speech on 'some recent developments in Canada's external relations,' in which he touched upon the appointments which have been made at Washington and Paris, and told his audience that he hoped there would be an exchange of ministers between Ottawa and Tokyo, shortly.

"The symbol of British unity is to be found in the British crown," Premier King said in concluding his address. "The security of the British Empire as a 'Throne which is based upon the people's will.' Whatever may serve to broaden the base, and thereby to secure more firmly the foundation upon which all government throughout the British Empire rests, is making for British unity and its permanency. It is making as well, I believe, for the peace of the world."

"It is in this belief, at least, that the present administration has sought at Washington, at Paris, and at Tokyo, not only to assume responsibility for all that pertains to the immediate interests of Canada, but by consultation and co-operation of her representatives with His Majesty's ambassadors at these capitals, to bring to bear as regards the British Empire, a united opinion with respect to all matters that may be of mutual concern."

Fishermen Are Rescued

Six Lake Manitoba Fishermen Marooned On Island Brought Safety To Shore

Winnipeg.—After hours of struggle through hazardous ice floes, rescuers reached six Lake Manitoba fishermen who had been marooned on a barren island, three miles from shore.

Two fellow-fishermen, A. M. Freeman, and his son, George, of Dog Creek, a little fishing settlement on the eastern shore of Lake Manitoba, about 150 miles from Winnipeg, were the rescuers. After two attempts had been unsuccessful, they gained the island—Gull Island—on the third, and the six fishermen safely placed in their 14-foot rowboat, fought their way back to the mainland through the treacherous ice floes and gale-swept lake.

The rescued men are: Swan Peterson; his son, Victor; Andre Ashman, Fred Cooper, Rudolph Elke, and Joe Lopston.

Make Preparations For Closing Of Navigation

Ship Owners Asked For Final Sailings On Great Lakes

Ottawa.—In preparation for the close of navigation all ship owners have been requested by the department of marine to advise when their last vessels will leave the head of the Great Lakes. Failing an agreement between United States authorities and owners across the border, the department has been unable to arrange for navigation to close on December 7 as was hoped.

All Canadian lights and fog alarms on Lake Superior will be kept in operation until the close of navigation, with the exception of Caribou Island which may close on December 8, and be replaced by an unwatched flashing gas light; Otter Head, Davaroux Island, Quebec Harbor and Michipicoten Island, East End, which may close on December 12, and Ile Perierne which may close on December 15.

May Serve On Commission

London.—It is definitely settled that the United States shall be invited to serve on the new reparations commission and also that the commission should draw up a scheme for capitalizing and commercializing Germany's reparations liabilities so that bonds can be sold to private investors.

W. N. O. 1761

Announce Delegates To Air Conference

Winnipeg Postmaster Will Be Member Of Canadian Fair

Ottawa, Ont.—Announcement has been made here that D. J. Desbarats, deputy minister of national defence will head the Canadian delegation which will attend the international conference of civil aeronautics to be held in Washington, D.C., December 12 to 14, inclusive.

Accompanying Mr. Desbarats will be P. T. Coilean, assistant postmaster general, J. A. Wilson, controller of civil aviation, T. T. Hower, postmaster at Winnipeg, Man., and Wing Commanders J. L. Gordon and W. W. Stedman, of the Royal Canadian Air Force. A number of others are expected to join the delegation.

Orville Wright, of Dayton, Ohio, has been designated as the guest of honor at the international gathering in recognition of his successful pioneering in aviation, while a number of outstanding experts in the field of aviation are expected from the British Isles.

Wellington, N.Z.—H. R. Dix, representing the New Zealand Aero Club, and Captain H. J. Barlow, of the New Zealand Air Force, sailed for Vancouver. They will represent New Zealand at the international aeronautical conference which opens in Washington, December 12.

Grain Elevator For Churchill Terminus

Will Have 1,125,000 Bushels Capacity According To Plans

Port Arthur, Ont.—The C. D. Howe Company, of Port Arthur, has been commissioned to prepare plans for a terminal grain elevator of 1,125,000 bushels capacity to be erected at the Churchill terminus of the Hudson Bay Railway.

It was stated at the Howe Company offices that while a start has not yet been made, the proposed elevator is to be after the same general plan as the terminal elevator at Port Arthur and Port William, with certain possible modifications regarding the facilities for loading ocean vessels.

This will depend upon local conditions relative to exact location of the plant and whether this water will have to be considered. Information concerning this has yet to be obtained.

It was also stated at the Howe Company offices here that no information has been received concerning plans for a Hudson's Bay elevator for the wheat pool. C. D. Howe is now at the Pacific Coast and may have some correspondence in this connection, but that is considered hardly probable here.

To Raise Farming Profession

Herman Trelle Thinks Farming Should Be On Level Of Other Professions

Toronto.—"If there is anything I can do in the way of taking the hayseed out of farming, I'm going to do it," Herman Trelle, the world's wheat and oats king, said upon his arrival here to attend the royal winter fair where he has numerous grain exhibits. "Why shouldn't the farmer be an educated, cultured man, the same as those who follow any other profession?"

In 1928 Mr. Trelle produced 15,500 bushels of entirely registered seed grain, with the whole output placed at the disposal of the Alberta government, which pays him a premium on his product.

He has won championships in virtually every province in Canada and is the holder of 21 cups. Mr. Trelle has won every trophy but one in the Dominion. At the winter fair he is exhibiting wheat, oats and peas, all grown under the same conditions which produced him honors in other years.

Asked To Expedite Treaty

Ottawa.—Recent communication has been received from the British government asking that Canada expedite the reply regarding the replacement of the arbitration treaty between the British Empire and the United States, that expires next year. It is possible such a request may have been forwarded and not yet received here.

For Church Union

Edinburgh, Scotland.—The assemblies of the Church of Scotland and the United Free Church of Scotland, both voted by overwhelming majorities in favor of the union of the two churches. Final decision on the question will be made at the next assemblies in May. Both churches are Presbyterian in doctrine.

Ready For Grain Probe

Commission Will Hold Hearings In Saskatchewan During December

Hogbin.—The Royal Grain Commission, appointed by the Saskatchewan Government, will hold sittings in various parts of the province during December, to investigate the system of grading, handling, mixing and marketing wheat.

The commission will consist of Chief Justice Brown, chairman; John A. Stoneman, president of the United Farmers of Canada, Saskatchewan section; D. Rutherford, of the Saskatchewan College of Agriculture; P. Hedley Auld, deputy minister of agriculture; and H. F. Thomson, K.C., and W. E. Proctor, counsel for the commission.

TEST MILLING AND BAKING VALUES OF 1928 WHEAT

Regina.—Milling values of the various grades of 1928 wheat and the possibility of introducing the protein test into the grading system were discussed at the annual delegates' meeting of the Saskatchewan Wheat Pool, when Dr. F. J. Birchard, chemist in charge of the Board of Grain Commissioners' grain research laboratory, attended with an exhibit of bread baked from standards and averages of the various grades of wheat from the 1928 crop.

Dr. Birchard based his introductory comment on the report which was issued from his laboratory some time ago in which it was stated that the lower grades of wheat from the 1928 crop, most of which are heavily damaged by frost so far as physical appearance goes, are appreciably better in quality than similar grades of the 1927 crop. He read to the delegates the comment accompanying the milling and baking data in his report and was then subjected to frequent questions.

Dr. Birchard, in his statements believed that, generally speaking, frost had the effect of deteriorating the quality of the protein in wheat but that this was not the case this year as the same extent, as usual, owing to the fact that the frost came at a time when the grain was fairly mature.

In answer to a question as to whether results from an experiment will should be considered as fairly comparable with those to be expected from a commercial mill, Dr. Birchard answered: "Absolutely, otherwise why do all commercial mills maintain chemical laboratories?"

Asked as to whether the mills use No. 6 wheat for the manufacture of flour, Dr. Birchard answered that they had, and said that from his experience he would say that they were dealing as high as 100 per cent. of No. 6. He showed however that there was a gradual decrease in the percentage of patent flour between One Northern and Six wheat, the actual percentages in his tests having been 63.4 per cent. for the One Northern, and 60.2 per cent. for the Six wheat. The weight per bushel likewise decreased gradually from 64 pounds per bushel in the case of One Northern to 61 pounds in the case of No. 6 wheat.

Manitoba Liquor Profits

Winnipeg.—The Manitoba government liquor control commission realized gross profits of \$1,493,708.60 for the fiscal year ending April 30, 1928. The net profits amounted to \$1,345,117.25, according to the public accounts prepared for the provincial government.

NOTED MISSIONARY HONORED

Sir Wilfred Grenfell, noted missionary and doctor of Labrador, who was elected rector of St. Andrew's University, in England, defeating Lord Melchett, the former Sir Alfred Meade, by a majority of 137 votes.

Giant Fokker For West

First Tri-Motored Airplane For Use In Western Service

Winnipeg, Man.—The first tri-motored airplane for use in Winnipeg and the West will be brought here this week by W. L. Brintnell, operating manager of the Western Canada Airways, Ltd.

It is a big Fokker machine similar in construction and power to the famous "Southern Cross" which caused world-wide attention when it bridged the Pacific Ocean last year.

The big Fokker has a 72-foot wing spread, two feet longer than the big Ford plane brought to Manitoba for testing purposes by Bert Balchen and the late Floyd Bennett, early last spring. It has a capacity for 10 passengers, and if the baggage and express are light, for 15.

In commenting on the mail contract let to the Western Canada Airways by the Dominion government, Mr. Brintnell drew attention to the fact that the service will be in operation for the three shortest flying weeks of the year, December 10 to 20, that would shorten the flying hours, but the company, he felt sure could "make the grade" without trouble. A spare Fokker super-ultralight monoplane would be kept in readiness at Regina in case of mishap to the tri-motor.

Public sentiment and public support would make it possible to carry on the mail service as a regular service, Mr. Brintnell said.

Aviator Has Narrow Escape

French Plane Falls Five Miles But Lands Safely

Villa Couby, France.—The French pilot, Le Moigne, attempting to break the world's altitude record, lost consciousness when his oxygen inhaler failed at 30,000 feet, and fell nearly five miles before regaining his senses approximately 4,000 feet above the ground. He righted his plane and landed safely.

Le Moigne had been in the air one hour and ten minutes when his oxygen failed.

Draws Attention To Claim

Ottawa.—Admitting that he threw a stone through a window of Rideau Hall, the residence of the governor-general, in order to draw attention to his claims for pensions, William H. Coulter was fined \$2 and costs and ordered to pay \$2 for the repair of the window by the magistrate. Coulter said he picked out a small window so the damage would be less.

DRIVES LAST SPIKE

R. H. Stewart, founder of the Stewart Valley Settlement, in Saskatchewan, achieved a long standing ambition when he drove the last spike on the Alkinds North railway branch of the Canadian Pacific Railway recently. Reeve Smith, of Stewart Valley, held the spike, and every member of the community turned out in appreciation of the historic occasion. "Put your hands to the plow" was the motto of the day, and the value of the new line to the settlers.

Believes U.S. Election Verdict For Prohibition

May Mean Showdown With Canada Over Liquor Exports, Says Official

Detroit, Mich.—One of the highest prohibition enforcement officers in the United States, at a desk in a large office building here, and summarily expressed his opinion about the future of legalized rum exporting into this country.

"A country that condones and abets the exportation of liquor into a neighboring state where liquor is prohibited cannot honestly command the respect of God or man. Obviously, the presidential verdict can be interpreted also as an overwhelming verdict for prohibition, and a showdown with Canada naturally can be expected," he said.

Saskatchewan Legislature

Announcement Officially Made That Session Will Open Dec. 4

Regina, Ont.—Governor Newlands will officially open the fourth session of the Sixth Saskatchewan Legislative Assembly at 3 o'clock Tuesday afternoon, December 4. Premier J. G. Gardiner has officially announced.

The debate on the address in reply to the speech from the throne will open on Thursday, December 6. The honor of launching the debate this year will fall upon Chas. McIntosh, M.L.A. of Kinistino, who will move the address, while Dr. J. T. Waugh, the newly-elected member for the Arm River constituency will be the seconder in a maiden speech.

HERMAN TRELLE IS WINNER AT TORONTO FAIR

Toronto.—Herman Trelle, of Wembley, Peace River District, was awarded grand championship for hard spring wheat, at the Royal Winter Fair.

Manitoba won first and fifth on durum wheat, R. Brockington, of Melita, was first, and Alf Wood, Glenboro, first, while second place went to William Darnbrough, of Laura, Sask. Samuel Lacombe, of Birtle, won third on early oats, with a fine sample of Alaska.

The champion ribbon and silver trophy for the best half bushel of wheat at the show went to Herman Trelle, Wembley, Alta., on a sample of Reward, which adds another victory to his already remarkable winnings, partially won at the International show, Chicago.

Champion half bushel of barley went to W. C. Darnbrough, Laura, Sask., on O.A.C. 21. Championship for oats was won by Wm. Darnbrough, Laura, Sask. The winnings in the classes judged were as follows:

Spring wheat except durum: First, Herman Trelle, Wembley, Alta.; second, W. E. Darnbrough, Laura, Sask.; third, Wm. Pierce, Birtleman; fourth, S. Crossman, Laura; fifth, W. E. Smith, Swan River, Man.; seventh, Paul Braulieu, St. Flavie, Que.; eighth, J. E. Nixon, Wauchop, Sask.; ninth, J. W. McGhie, Marquis, Sask.; tenth, F. J. Rock, Morris, Alta.; eleventh, Alf Wiles, Indian Head, Sask.; twelfth, P. F. Robbins, Shaunavon, Sask.; thirteenth, Nels Skilstad, Chaukleton. Twelve of the thirteen prizes go to western Canada and there were fifty-seven entries. First for durum wheat fell to P. Brockington, Melita, Man., with W. E. Darnbrough and Wm. Darnbrough, Laura, Sask., second and third Fourth went to Brown, of Millbrook, Ont., fifth to Alf Woods, Glenboro, Man., and sixth and seventh to Guelph and Udon, Ont., men. There were ten entries.

There were sixteen entries in early oats from Alaska; Wm. Darnbrough, Laura, second on Alaska; S. Lacombe, Birtle, third on Alaska; fourth to McCutcheon, Guelph, and fifth to H. Cabana, St. Catharines, Que.

On the other hand, early oats were 15 in number of which William Darnbrough was first, and champion, and Trelle second, on Victory in each case. Third fell to Nels Linden, Wetsask, Alta.; and fourth to J. H. E. Smith, Wolf Creek, Alta.; also an Victory. Fifth went to McCutcheon, Guelph, and sixth to Paul Braulieu, of Quebec. Hannsmyer, Vegreville, had seventh, Wm. Whitecock, Kelwood, Man.; eighth, S. Lacombe, Birtle, ninth, J. F. Field, Regina; tenth, P. J. Rock, Morris, Alta., eleventh.

MANY ENTRIES FROM WEST IN CHICAGO SHOW

Chicago, Ill.—The shepherds of the eastern provinces and the horse and cattle breeders of the west will unite this year in a determined drive to win for Canada the major share of the blue ribbons and kindred honors in the International Livestock Exposition, which opens at the Union Stock Yards here, December 1. The exposition, opening officially on Saturday afternoon, will get under way in earnest on Monday, when the judging in the cattle classes begins. Judging will continue until the end of the show, December 8.

As in past years, a hay and grain show, with exhibitors from all parts of the United States and Canada, will be held in connection with the Exposition, while show horses will compete each evening during the week in the pavilion which serves as judging quarters for the livestock entries.

The provinces of Alberta and Saskatchewan are heavily represented, their entries being entirely in the cattle and horse divisions.

In the sheep division Ontario breeders are owners of more than one-third of the animals entered. The Clydesdale classes in the horse division have in the past been the pride of Western Canada's great triumphs, and the entries this year promise many ribbons for the Dominion's animals again. There are twelve Clydesdales entered representing four breeders. The largest of these is that of J. E. Falconer, of Cochrane, Sask., who is sending five of his horses to the show. The provincial farms of Edmonton are sending three, and Thos. McMillan, of Okotoks, Alberta, and Munroe and Wood, of Carstairs, Alta., are exhibiting two animals in the class.

In the Percheron classes two Sask. breeders make up the Canadian entry. C. M. Rear, of Regina, has ordered stall space for five of his animals, and Robert Weir, of Eldon, Sask., is shipping three. He is also sending a single Belgian stallion to the show to compete against the 127 entries in this class from the U.S.

The western and eastern provinces divide forces in the cattle division. Nine are entered from Alberta in the Aberdeen-Angus class. Harry G. Morrison, of Lacombe, has the largest entry, seven of his breeding animals being entered. The provincial farms and the breeders of Alberta, both of Edmonton, are exhibiting two fat Aberdeen-Angus each.

In the Shorthorn competition, Duncan Campbell, the Moffatt, Ont., breeder, has a large entry of fourteen animals in the breeding classes. The University of Alberta, and the provincial farms of Edmonton will both also exhibit fat animals in the Shorthorn division.

The O'Brien Farms, of Renfrew, Ont., the University of Alberta, and Frank Collicott of Crossfield, Alta., are among the breeders in the Hereford division.

Empire Goods Are Given Preference

Hoped New Regulations Will Help To Stimulate Production

Ottawa.—Hon. W. D. Eider, Minister of National Revenue, announces that after February 1, goods entering Canada under British preferential rates must be of Empire material and labor. The present percentage of Empire materials and labor now required is 25. The new regulations will, it is hoped, stimulate production within the Empire.

A corresponding provision has been made with regard to imports under the intermediate tariff under special treaties and conventions. Hon. J. A. Robb, in the House last session, intimated that it was proposed to increase from 25 to 50 the percentage of Empire labor and materials required in goods qualifying under British preferential rates.

Farmers Elect Executives

Saskatoon.—H. Mills, Colonsay, Sask., was elected district director, and W. J. Coe, Plunkett, district executive chairman at the annual convention of the United Farmers of Canada, Saskatchewan section, district 13, here. Messrs. Cannon, of Aberdeen, Mollard, of Watrous, W. Streiten, and Mrs. W. J. Coe, of Plunkett, were elected to the district committee.

Canadian Representative

Ottawa.—Senator Dandurand will be Canadian representative at the council of the League of Nations which meets in Geneva on December 30.

Roses are sometimes red,
 Violets are always blue.
 St. Anne's Bazaar is coming,
 And I am coming, too.

"Looks Like Rain" at Bellevue to-night.

A number of local children got terribly scared when a meat market advertised baby beef for sale.

Everything new and novel, too, at the opera house, Saturday, December 1st.

Local and General Items

Alberta divorce courts are still kept very busy.

Watch for "Red Dances." It's one of the big ones. Here soon.

The date of St. Anne's Bazaar is drawing near—December 1st, Saturday.

The Calgary Power Company has offered \$40,000 for the Cardston power plant.

Any old vinegar may know its mother, but it takes a good cork to know its own pop.

If weather conditions permit, the local arena will open for skating about Saturday or Monday.

Miss Lillian Gish strikes a new note in her matchless art, in a thrilling epic of the golden west, at the Orpheum, Friday and Saturday.

Roddy McDonald, well-known middleweight boxing champion, has been sentenced to serve two years in penitentiary for robbery with violence.

Get your coupons now for the electric lamp. You may be the lucky one. Some one will get a nice prize. It's sure worth while to try for same.

It is interesting to note at this time that The Enterprise will convey the Prince of Wales from East Africa to England. Another proof of the power of the press.

Sam Savage, genial grand secretary of the Elks, has donated a cup to the Elks at Hanna for competition purposes. Herb McCrea states that the cup was empty when it arrived.

"The Wind" is the story of a beautiful, sheltered girl thrust into the rough, savage and unceremonious life of the western pioneers and who is forced by circumstances to marry a man whom she does not love and has to live with him under the most primitive conditions.

A Frenchman, being troubled with the gout, was asked what difference there was between that and the rheumatism. "One very great difference," replied monsieur; "suppose you take one vice, you put your finger in it, you turn de screw till you bear him no longer—that is ze rheumatism, den, 'pose you give him one more turn—that is ze gout."

Vernon.—For the first time in the history of bee-keeping in British Columbia one bee-keeper in the Okanagan Valley has exported a full carload of honey from over a million. His 25 colonies gave him an average of 175 pounds of honey per colony.

Ottawa.—A survey will be made this year for a Canadian air mail route between Montreal and Winnipeg. This will consist of determining the best routes and locating landing fields. Recent announcement of four air mail contracts between points in Eastern Canada forecast more extensive operations along this line at an early date.

Midland, Ont.—For the first time in the history of this progressive town, a through Canadian Pacific train left here early in May for Toronto, and the first C. P. R. through train arrived from Toronto later in the day. A bottle of champagne was broken across the fender of the C. P. R. locomotive as it pulled out of Midland.

Skating in July and August will be a prominent feature of the combined winter and summer camp to be operated in the Canadian Rockies under the shadow of Mount Asinibet by Marquis N. degli Albizzi. The winter sport is made possible by the fact of a huge glacier that runs down the slopes of the mountain. Summer sports of variety will also be possible at the camp, which is one of the beauty spots of that part of the Rockies traversed by the Canadian Pacific.

Toronto.—Premier G. H. Ferguson announces that the Government has signed a contract with the Canadian Pacific Railway for the supplying of two additional cars to be used as "travelling schools" in the outlying districts of the province. The cars will be equipped in Winnipeg and both will run out of Port William, operating between that city and Superior Junction. At present, two cars are in operation, both in Northern Ontario. Not only children of trappers and railway workers, etc., receive instructions in these travelling schools but night classes are arranged for adults.

Latest reports state that King George's condition is improving.

Mrs. A. Noel Cox, of Burnis, is confined to her home with an injured foot.

"The Bazaar Without a Par."—St. Anne's. At the opera house on December the 1st.

The body of a Jap was found in a trunk shipped from Lethbridge to Vancouver.

A movement is on foot at Cadomin to erect a combined skating and curling rink, to cost in the neighborhood of \$8000.

FOR SALE—Western Queen Cook-stove with reservoir. Will be sold cheap. Apply to T. Murphy, Blairmore.

Constable D. I. Eaton, of the R.C.M.P., was found dead in his car near Dubuc, Saskatchewan, believed to have suicided.

The arrival of a baby daughter is very much responsible for the enlargement of Harry Griesbach's perpetual smile.

A. E. May, of Edmonton, provincial representative of the Oddfellows' Relief Association, was in Blairmore last week end.

Good goods, fancy goods; lots of goods for all your "wouids," at the opera house, December 1st. St. Anne's Bazaar.

We congratulate Mr. Frank Leary, of Blairmore, upon his election as vice-president of the Mine Workers' Union of Canada.

William Mountain, of Cowley, paid a fine of \$20 and costs for having liquor in his possession at a dance at Lundbreck on Friday night.

Drumheller B. P. O. Elks recently banqueted S. S. Savage, the grand secretary-editor, on the occasion of his first official visit to their lodge.

Two fine buck deer were brought to town on Saturday last by Messrs. Weaver and Bartlett. They secured their trophies near the Head Syndicate properties.

William Coffey, proprietor of the Corono beauty parlor and barber shop at Edmonton, was accidentally killed while hunting in the vicinity of Edson.

The Blairmore local of the Mine Workers' Union of Canada has already forwarded \$500 to the relief of the striking miners and their families at Wayne.

Young Hutton, a Bellevue goalie, and Percy Anderson, of Blairmore, are among the young lads who are trying out for the new formation of the Calgary Jimmies, juniors.

Before returning for the day's sleep, many of our local flappers viewed the total eclipse of the moon at 4 o'clock on Tuesday morning. That's easy! Now give them a chance to see the sun by day.
